

JCS Summer Camp New Additions.....

"Camp-Bell Sing Camp"

Come join in the fun at "*Camp-Bell Sing Camp*" to learn how to sing **alone** and as an **ensemble** while learning traditional Folk Songs, Disney Classics and songs from well known Broadway Musicals! We will also explore how to play the bells in a group as we continue to learn musical terminology and theory! (Bells will be provided.)

Price: 150.00 per week

Ages: (going into) 1-3 grades

Session II 1:00 - 4:30

Ages: (going into) 4-6 grades

***** (Please Bring Water and snack) *****

Robin Campbell has been a South Florida resident since 1974. Graduating from John I. Leonard high school in 1979, she immediately went to college. In 1985, she completed her music education degree, while married with one child, from the University of Miami. Furthering her education, she went to law school in 1987. She has been volunteering and teaching in the field of music for sixteen years as her five children were growing up. Specifically, she has taught voice at Grace Homeschool for 10 years with a brief interruption as she was working at Florida Atlantic University getting her Masters of Arts degree in Choral Conducting in 2012. Presently, she is working as Music Director at Good Shepherd School in Tequesta, singing with Singularity a local a cappella group, playing french horn the Grace Immanuel Orchestra and selling homes as she is employed as a realtor with Keller Williams of Jupiter. Although she is passionate about many areas of life, her love for Christ is tremendous. With a thankful heart for the privilege of serving in the capacity God has allowed her, she welcomes each new student/teaching opportunity as a gift from Our Lord.

STEM Robotics Summer Camp

Hosted by Jupiter Christian School

Create and Command Your Own Robot

This summer, join us as we build and control LEGO MINDSTORMS EV3 robots to complete challenges and have fun along the way. Each camper will be given their own robot to modify however they see fit, as well as receive help and guidance to achieve their goals. If your child has any interest in pursuing STEM as they move on to higher education, this is a great place to start.

When: The week of July 9-12th

Where: Room 103, From 9:00am to 12:00pm (3 hours)

How much: \$150 per child
